

OPSYRIS 2019

Organisation for Psychological Research Into Stroke

Friday, 4th October 2019

St Anne's College, University of Oxford

PROGRAMME

- 9:30 - 10:00** **Registration and coffee**
- 10:00 - 10:10** **Welcome from OPSYRIS Chair**
Dr Terence Quinn, University of Glasgow
- 10:10 - 10:25** Dr Nele Demeyere, University of Oxford
Cognitive Screening for milder cognitive impairments: introducing the OCS-Plus
- 10:25 - 10:40** Ms Emma Elliott, University of Glasgow
Associations between results from the OCS and later functional and quality of life measures
- 10:40 - 11:05** **'Quick-fire' Session I**
Ms Elise Milosevich, University of Oxford
Prevalence and measures of cognitive impairment in chronic stroke: a systematic review

Dr Eugene Yee Hing Tang, Newcastle University
Prioritising actions for the six-month review for post-stroke survivors presenting with cognitive impairment: A Delphi study

Dr Marianna Kapsetaki, Imperial College London
Examining spatial memory after stroke

Dr Hannah Stott, University of the West of England
Qualitative study of feasibility and acceptability of using tools assessing altered body perception and associated discomfort in stroke
- Q & A**
- 11:05 - 11:10** **Rising Star Award**
- 11:10 - 11:25** Dr Niamh Merriman, Royal College of Surgeons in Ireland
A novel cognitive rehabilitation intervention for post-stroke cognitive impairment
- 11:25 - 11:40** Dr Michele Veldsman, University of Oxford
Cerebrovascular burden and brain network degeneration underlying executive impairment after ischaemic stroke
- 11:40 - 11:55** Dr Kathleen Vancleef, University of Oxford
Current practice and challenges in screening for visual perception deficits after stroke: a large-scale qualitative study

11:55 - 12:55

Lunch and Poster Viewing I

12:35 - 12:45 Poster Session I Spotlights

Ms Misbah Gladwyn-Khan, Cardiff University

Acceptance and commitment therapy based bibliotherapy for psychological difficulties after stroke

Ms Helen Gowling, Lancaster University

An evaluation of the use of a self-management tool and strategies following discharge from a community stroke rehabilitation team

12:55 - 13:10

Dr Jain Holmes & Ms Katie Powers, University of Nottingham

Exploring occupational therapist (OT) attributes on trial outcomes and determining competence to deliver early stroke specialist vocational rehabilitation

13:10 - 13:25

Dr Camille Julien, University College London Hospital NHS Foundation Trust

Changing the narrative: Developing a psychology service as part of an intensive rehabilitation programme for people living with aphasia

13:25 - 13:40

Dr Giles Yeates, Buckinghamshire Healthcare NHS Trust

Beyond the talking cure for aphasia post-stroke: The mind-body adaptation of psychological therapies

13:40 - 14:05

'Quick-fire' Session II

Dr Nicholas Behn, City, University of London

Supporting wellbeing through PEeR-Befriending (SUPERB) trial: Fidelity in peer-befriending for people with aphasia

Mr Matthew Checketts, University of Manchester

International and inter-professional practice – the screening and diagnosis of spatial neglect

Ms Margaret Moore, University of Oxford

Neglect based reading impairments: dissociations between sentence level and word-based neglect dyslexia

Dr Satu Baylan, University of Glasgow

Incidence and prevalence of post-stroke insomnia: a systematic review and meta-analysis

Q & A

14:05 - 14:40

Coffee and Poster Viewing II

14:25 - 14:35 Poster Session II Spotlights

Dr Maggie Lawrence, Glasgow Caledonian University

HEADS: UP feasibility and pilot testing

Dr Emma Patchwood, University of Manchester

Acceptance and Commitment Therapy (ACT) to address psychological distress in life after stroke (work in progress)

- 14:40 - 14:55** Dr Eirini Kontou, University of Nottingham
Optimising Psychoeducation for Transient Ischaemic Attack and Minor Stroke Management (OPTIMISM): A feasibility randomised controlled trial
- 14:55 - 15:10** Dr Emma Patchwood, University of Manchester
Organising Support for CARers of Stroke Survivors (OSCARSS): findings from a Cluster Randomised Controlled Trial, including Health Economics
- 15:10 - 15:40** Professor Sarah Pendlebury, University of Oxford
Keynote Lecture
- 15:40 - 16:20** **'How to...'** sessions
- (1) *PCPI*
Ms Laura Piercy, The Stroke Association
 - (2) *Prioritisation of Cochrane reviews*
Dr Terence Quinn & Dr Jenny McCleery,
Cochrane Stroke and Dementia Group
- 16:20 - 16:30** **Closing remarks from OPSYRIS Chair**
- 16:30** **Close**
- 16:30 - 17:00** **OPSYRIS business meeting**

POSTERS

1. Ms Misbah Gladwyn-Khan, Cardiff University
Acceptance and commitment therapy based bibliotherapy for psychological difficulties after stroke
2. Ms Helen Gowling, Lancaster University
An evaluation of the use of a self-management tool and strategies following discharge from a community stroke rehabilitation team
3. Dr Maggie Lawrence, Glasgow Caledonian University
HEADS: UP feasibility and pilot testing
4. Dr Emma Patchwood, University of Manchester
Acceptance and Commitment Therapy (ACT) to address psychological distress in life after stroke (work in progress)
5. Dr Jade Kettlewell, University of Nottingham
A scoping review of psychoeducational interventions for people after Transient Ischaemic Attack (TIA) and minor stroke
6. Dr Mariam Mansoor, Aga Khan University
Prevalence of depression in caregivers of patients with stroke in Pakistan
7. Ms Rachel Cripps, King's College London
Return to work after stroke: a systematic review and evidence synthesis
8. Ms Corin Harrison, University of Oxford
A Theory of Visual Attention-based assessment of stroke survivors with and without simultanagnosia (work in progress)
9. Ms Roberta Calvo, Imperial College London
Tracking Spatial Neglect recovery pattern following right-hemispheric stroke
10. Ms Helen Morse, University of East Anglia
Feasibility and potential effects of a portable self-administered computerized therapy for spatial neglect post-stroke (c-SIGHT): preliminary findings of a multiple baseline pilot study
11. Professor Audrey Bowen & Ms Kate Woodward-Nutt, University of Manchester
SPATIAL - Study of Prisms And Therapy In Attention Loss after stroke: Lessons learnt in the first year of a feasibility trial
12. Dr Lucy Beishon, University of Leicester
The effects of brain training on brain blood flow after acute ischaemic stroke
13. Mrs Annegret Hagenberg, University of Leicester
Personality and susceptibility to touch-illusion – interdisciplinary perspectives on implications for stroke research
14. Mr Sam Webb, University of Oxford
Multiverse analysis: An examination of outcome fragility in validating executive functioning tests
15. Ms Bogna Drozdowska, University of Glasgow
Associations between physical activity, sedentary behaviour and cognitive function following self-reported stroke: A cross-sectional analysis of UK Biobank (N=8776)
